Professional Summary

AI Engineering undergraduate with hands-on experience across LLM applications, RAG pipelines, and multi-agent systems using Python, LangChain, and LangGraph. Strong problem-solving foundation with 600+ DSA problems solved and multiple hackathon finals. Seeking AI Engineer roles focused on agentic systems and production LLM applications.

Technical Skills

Languages: Python, C++, Java, JavaScript, SQL

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, NLP, Prompt Engineering

Gen AI: RAG, LangChain, LangGraph, Agentic AI, Multi-Agent System, Function Calling, Embeddings

AI Technologies: Hugging Face, FAISS, Vector Databases, REST APIs

Tools: VS Code, Git/Github, Postman, Vite, Streamlit

Soft Skills: Teamwork, Communication, Adaptability, Leadership

Web Technologies: React.js, Next.js, FastAPI

Professional Experience

Neesa Agency - AI Engineer Intern

Dec 2025 – Feb 2026

Ghaziabad, UP

3 Months

- Developed LLM-powered applications using Python, LangChain, and RAG pipelines to deliver context-aware responses from external knowledge sources.
- Built retrieval workflows using embeddings and vector databases to improve context relevance for downstream LLM generation.
- Refined prompt templates and retrieval strategies, increasing LLM response relevance by 25% and enhancing overall output consistency for complex queries.

Projects

Multi-Agent Research System | LangChain, LCEL, Streamlit

[View on GitHub](#)

- Built a multi-agent research pipeline with Search, Reader, Writer, and Critic agents that pass state through a shared workflow to generate structured research reports.
Designed LCEL-based orchestration system enabling agents to perform real-time web search and extract content from 200+ URLs, reducing report generation time by 30%.
- Engineered an automated Critic agent feedback loop, increasing report factuality scores by 25% across 50+ test benchmark datasets.
- Developed a Streamlit interface for end-to-end interaction, from query input to final report generation.

AI-Powered Pull Request Review Agent | LangGraph, Redis, PostgreSQL

[View on GitHub](#)

- Built a production-grade multi-agent code review system combining retrieval, orchestration, confidence scoring, and human-in-the-loop approval.
- Implemented semantic, episodic, and procedural memory layers, enabling the agent to reason over past reviews and codebase context.
- Architected an event-driven review pipeline using GitHub webhooks, Redis queues, and PostgreSQL, processing PR evaluations with <3-second latency and 20% lower token consumption.
- Orchestrated the multi-step review pipeline (parsing → retrieval → analysis → scoring → approval) using LangGraph with full observability.

AI-Powered Student Career Intelligence Platform | GenAI, LLM Application, React.js

[View on GitHub](#)

- Automated LLM-powered resume generation by transforming structured student data into ATS-optimized, role specific resume content using prompt engineering and Generative AI.
- Enabled AI-powered portfolio generation by converting student achievements, projects, skills and experiences into structured, recruiter ready professional portfolios.
- Leveraged AI-driven dashboard analysis to extract student strengths, achievements, skill gaps, and career insights from aggregated profile data.

Certifications

Machine Learning Specialization — Stanford University via Coursera

2025

Supervised learning, unsupervised learning, neural networks, and reinforcement learning; hands-on with NumPy, scikit-learn, TensorFlow.

CS50x: Introduction to Computer Science — Harvard University via edX

2024

Algorithms, data structures, memory management, web development; completed 10 problem sets and an independent final project.

Achievements

- Top 3 Teams — Smart India Hackathon (College Level).
- ML Hackathon — Top 5 finalist in TECH ZEPHYR organized by IIT BHUBANESHWAR.
- CodeKalesh Hackathon — Top 10 finalist among nationwide participants, organized by IDEAKODE.
- Solved 600+ DSA questions on LeetCode, GeeksforGeeks and Coding Ninjas.

Education

Bachelor of Technology (B.Tech) — Computer Science & Information Technology

2023 – 2027

Ajay Kumar Garg Engineering College, Ghaziabad (CGPA: 9.0)

Intermediate (12th)

2022

Mother Teresa Mission Higher Secondary School, Kanpur (96%)
